

Collaborative Shaping of Research Agendas In WoodWisdom-Net

Questionnaire for workshop participants

Workshop for funding organisations: Tuesday March 28, 2006, Vantaa

Participant name:

Organisation:

Country:

With this form, we collect your estimations on what sub-areas and how much your organisation would tentatively be willing to fund in WoodWisdom-Net. For each sub-area, you are kindly requested to estimate:

1. How much your organisation would *tentatively* be willing to fund research project related to the sub-area (applied/basic research)?
2. Within what years your organisation would be able to distribute these funds?

Furthermore, you are requested to identify what specific research issues seem to be of greatest interest to your organisation.

Sub-area 1.1 Wood-based biopolymers to composites:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 1.2 Eco-friendly chemicals and polymers:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 1.3 Creating new functionalities or improved to materials/products:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 1.4 Combining fibres with other materials:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 1.5 Creating new innovative wood and fibre structures for different end-uses:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 1.N Other:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 2.1 Modification and processing of wood raw material into innovative, eco-efficient products:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 2.2 Effective utilization of side streams:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 2.3 Development of recyclability characteristics:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 2.4 Advanced production of bioenergy:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 2.5 Utilization of enabling technologies to improve productivity and reduce capital costs:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 2.N Other:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 3.1 Techniques for measurement and characterization of the properties of wood and fibres:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 3.2 Tree breeding using traditional techniques or forest biotechnology:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 3.3 Factors affecting wood and fibre properties:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 3.4 Silvicultural methods, procurement and harvesting operations:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 3.5 Optimizing the raw material supply chain for specific products or demands:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 3.N Other:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 4.1 Combining social and natural/engineering sciences:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 4.2 Values and perception:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 4.3 New business models:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?

Other comments:

Sub-area 4.N Other:

How much your organisation would *tentatively* be willing to fund research project related to this sub-area?

Basic research: _____ €

Applied research: _____ €

Within what years your organisation would be able to distribute these funds?

_____ - _____

What specific research issues seem to be of greatest interest to your organisation?
